

45th Scientific Symposium

United States-Japan 

Natural Resources Panel on Aquaculture

Marine aquaculture in a changing environment

October 16 and 17, 2017

International Conference Center, Hiroshima, Japan

The US-Japan Natural Resources Panel on Aquaculture is hosting its 45th annual Scientific Symposium. Presentations should be related to science and technical issues associated with the potential of aquaculture to mitigate impacts of environmental change. Topics include, but are not limited to:

- Bioextraction of nutrients
- Ocean acidification
- Adaptation to climate change
- Oxygen production

Information on tentative schedule, abstract submission, travel awards can be found at the [45th UJNR homepage](#). Information on registration to follow.
